Speaker's Profile

Dr. Linn Htet

HIV Technical Lead at Community Partners International (AIS)

Dr. Linn Htet is a medical doctor holding a Master's degree in Public Health from the University of Bedfordshire, UK, and has almost two decades of experience in the field of HIV.

He has been working as HIV Technical Lead with AIS/CPI. He is the strategic technical lead for the AIS project, providing strategic directions and technical assistance to AIS partners & local KP-led organizations.

He also worked as Technical Director with FHI360's EpiC project in Myanmar for 1.5 years. He has 12 years of experience working with MSF-Holland in several positions, focusing on HIV/TB/MDR-TB, and more than five years in PSI, MAM, and CPI.

Speaking Topic – AIS Funded Virtual HIV Services & expected outcomes

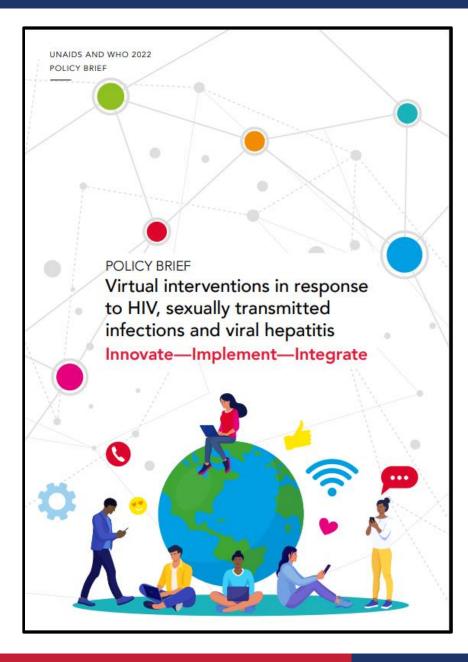

AIS Funded Virtual HIV services & Expected Outcomes

Linn Htet HIV Technical Lead

28 Apr 2023

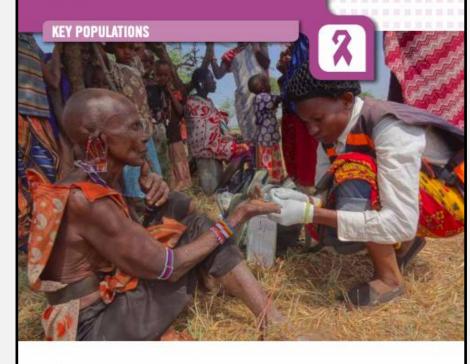

Why Online Outreach?

- Expand outreach for KPs unreached through traditional services
- Growing number of KPs who use the internet and prefer services using virtually
- □ Focusing promotion and demand-creation efforts on KPs who may benefit from them
- Providing new options that better meet the preferences of KPs
- Improving the efficiency of service delivery and conserving clinic capacity by reducing clinic visits
- Mitigating service disruptions in COVID-19 and other potential security threats among KPs

SERVING THE NEEDS OF KEY POPULATIONS: CASE EXAMPLES OF INNOVATION AND GOOD PRACTICE IN HIV PREVENTION, DIAGNOSIS, TREATMENT AND CARE

JUNE 2017

Online communications

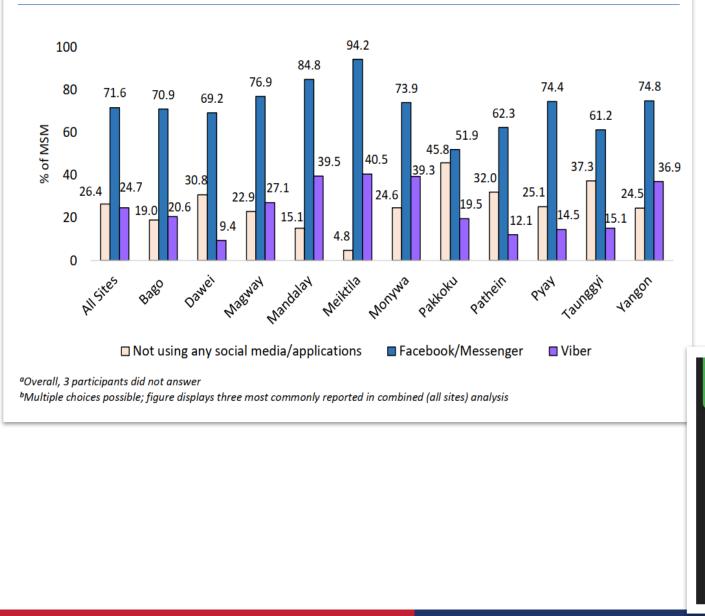

- □ Reach marginalized populations
- Share information in a discreet and confidential way
- □ Preserve anonymity
- Promote the uptake of services and support adherence to treatment
- □ Effective for young KPs and KPs criminalized and vulnerable to discrimination and abuse.

FY 2024 Technical Considerations

- Utilize social media and other ICT platforms to reach KPs reluctant/unable to access services because of stigma, preference for virtual service, COVID-19, and security threats
- Utilize virtual approaches by peer workers, and case managers to complement standard venue-based services to access undiagnosed sub-populations of KPs
- Provide general education, risk screening, booking for testing via online methods and referring for community and facility testing, and other optimized testing approaches including SNS, index testing, RNR, and HIVST
- Continue support through referral follow-up, appointment reminders and management, treatment literacy, adherence support, and overall case management
- Tracking and reporting services along the cascade to assess the impact, use for decision-making, and ensure linkage to a full range of quality HIV services.

Myanmar Integrated Biological and Behavioural Survey Among Men Who Have Sex With Men 2019

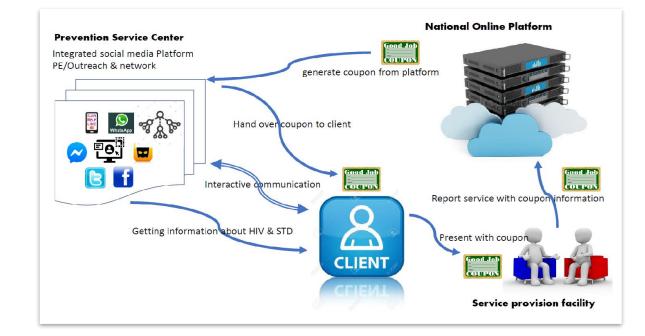

Myanmar NSP IV

Innovative prevention activities tailored to each of the KP groups and regions.

Adapted online information and access to services using

- Online and hotline platforms for risk assessment and referral
- Social media applications
- Assisted partner notification
- Self-testing and PrEP

AIS HIV Communication Strategy

ADVOCACY AND NETWORKING **ONLINE AND SOCIAL MEDIA INTERVENTIONS** Regular stakeholder coordination meetings → Implement and support social media interventions and media awareness campaigns → Work with KP-led local CSOs, networks and other IPs driving demand creation & referral networking → Social media engagement to broadcast information, and advice, identify potential clients and build and → Advocacy for DSD models and expansion of maintain an online community of KPs community-led services → ORA for PrFP and HIVST **HIV Communication** Strategy IEC AND MASS MEDIA COMMUNITY MOBILIZATION, ENGAGEMENT, AND → Pamphlets, posters, job aids, flipcharts **CAPACITY BUILDING** Engage media outlets TV, FM radio, magazines, and ➔ Participate in Pride festivals, WAD events journals to cover campaigns and intervention launches → Community mobilization using social influencers, Media engagement for HIV services (interviews, Q&A sessions with partners) and KOL → Organize training, conferences, and webinars on the

learning platform and COP

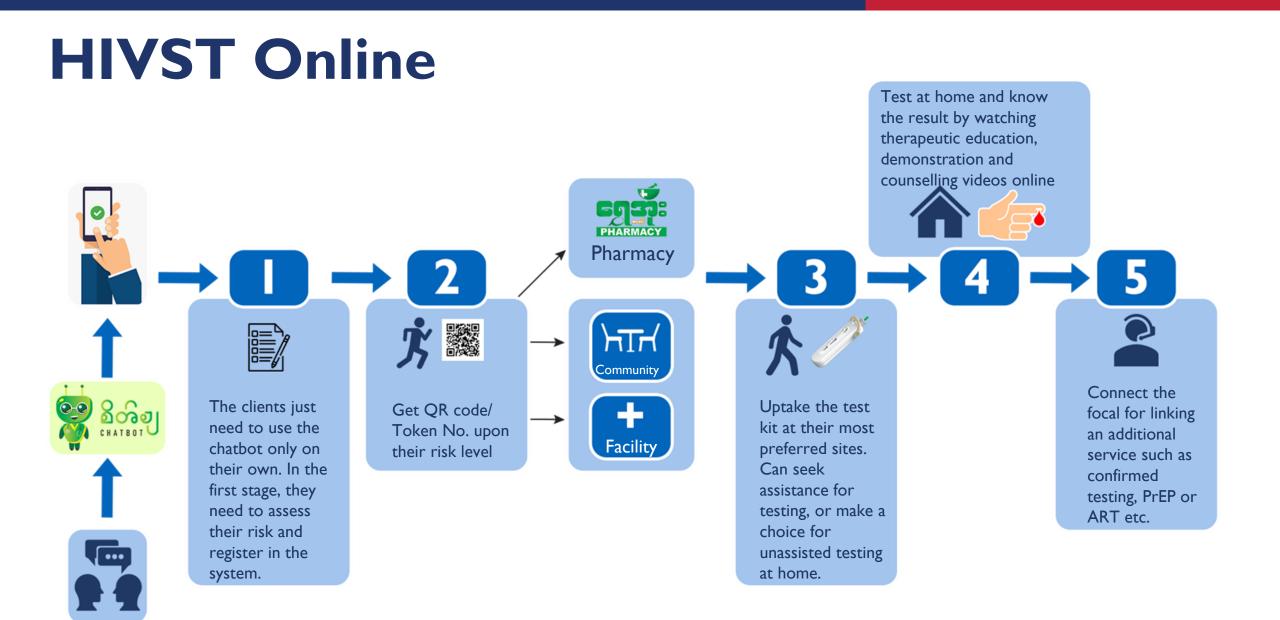

What we have done so far?

Online Outreach

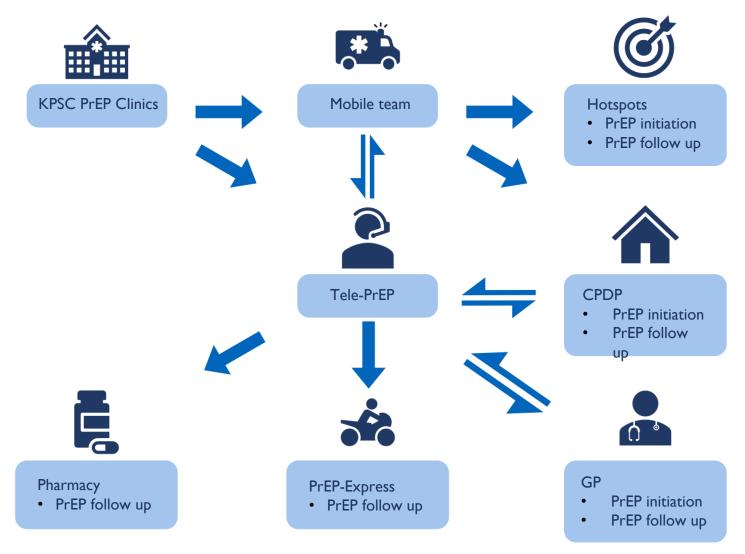

- **Social Network** through one on one chat using virtual platforms
- Social Influencers using influential, credible, and well-connected online gatekeepers as important partners
- **Social Profiles** through social media pages of the organizations or campaigns
- Online Reservation Applications selfrisk assessment and online booking for HIV services

What we are planning to do?

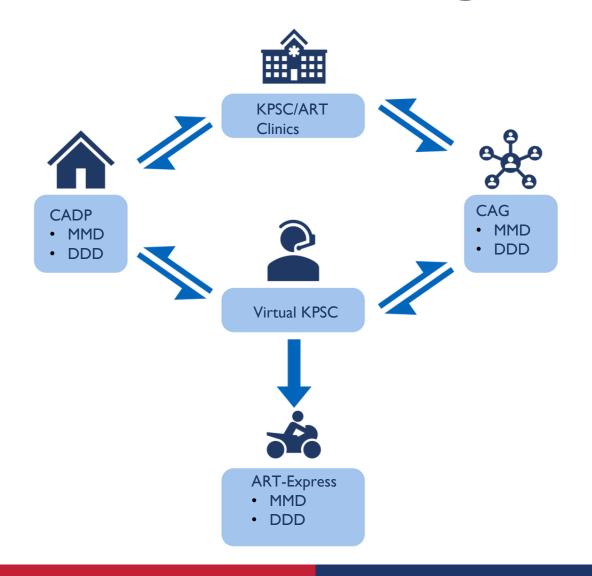

Virtual PrEP services

All PrEP users initiated with differentiated PrEP initiation (mobile, CPDP, and GPs) will have access to virtual or Tele-PrEP services including PrEP Express and Pharmacy Distribution points for easier followup and access to PrEP.

Virtual case management

ART clients will be linked with virtual KPSC for adherence support and counseling and mitigation for ART delivery at home or DDD in crisis situations.
